Re: Mariner East 2 Segment [#]- Pennsylvania
Proposed Pipeline Project - Survey Permission
Tract #: [number], [County], [State]
Brief Legal Description

Dear ,

Sunoco Pipeline L.P. (Sunoco), is investigating the possibility of installing a pipeline extending from Harrison County, Ohio through the panhandle of West Virginia, across Pennsylvania, and into Delaware. This project is an important enhancement to our nation's pipeline infrastructure and will allow Sunoco to better meet the country's energy demands.

One of the first activities Sunoco will undertake is the performance of civil surveys and studies to evaluate the viability of Sunoco's plans, provide information required by certain regulatory agencies as part of their review of the pipeline proposal, and accurately define the rights of way and easements necessary for the project. Sunoco has determined that the land described above, in which you may have an interest (your "Property"), may be affected by this project and, as such, Sunoco desires to conduct a survey and non-invasive feasibility studies on your Property.

Although Pennsylvania state law provides Sunoco with the right to conduct these surveys and inspections without your express permission, we prefer to obtain your consent before entering upon your Property. A Survey Permission form is enclosed for your review. Please sign and return it to me as soon as possible in the enclosed postage paid return envelope. If we do not receive a signed Survey Permission form from you, Sunoco will proceed to conduct the surveys and studies at its discretion, during reasonable daylight hours.

Upon completion of the survey, if it is determined that the pipeline route will cross your property, a Sunoco agent will contact you to discuss the purchase of an easement or other rights.

You should be hearing from us again in the near future. In the meantime, please feel free to call me at the number below with any questions. We sincerely thank you for your assistance with our important efforts to strengthen our nation's pipeline infrastructure to better meet our country's energy demands.

Very truly yours,
