- 5) Plan next step
- 6) Select date for next meeting
- 7) Any other matter/public comment
- 8) Adjournment

Digging out for temporary access road at Wyndham Lane and Barker Drive

Digging out northern corner of pond (where a spring is located). Water will be pumped from the sump into the stream behind the pond. Stone lain down to prevent erosion and stabilize area.

Area behind pond. Due to heavy rains, this area needed to be dug out (over existing pipeline) and new stone was added to prevent future blowouts.

Main drainage pipe (i.e. where outfall structure drains). Stone added to prevent future mud blowouts in the event of major rain.

Stone lain along Barker Drive. This stone will be gradually moved down to the pond over the coming weeks.
